

The Turning Point:

From The Darkness into The Light

Sherif Baba 2014 Spring North America Tour

Our world is in an agitated state of rapid change on all levels: environment, government, economy, culture; physically, intellectually, and spiritually, we are in full motion. This can be unsettling, if you aren't able to see where we are going.

Sherif Baba often says that the night is between two days, and that the dawn is approaching.

During this weekend event, we will explore where we are and where we are going. He will help us to realize what our parts are in this changing landscape of the soul. He embodies selfless ecstatic love, humility, humor, and sincerity.
